

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1.– 3. (Cancelled)

4. (Withdrawn) A cell differentiation-inducing agent or cell death-inducing agent comprising any one of (a) to (c) as an active ingredient:

(a) a double-stranded RNA comprising an RNA complementary to a transcript of WT1 gene and an RNA complementary to the RNA;

(b) a DNA encoding the double-stranded RNA of (a); and

(c) a vector carrying the DNA of (b) as an insert.

5. (Withdrawn) The agent of claim 4, wherein the double-stranded RNA is complementary to the nucleotide sequence of the WT1 gene transcript shown in SEQ ID NO: 1.

6. (Withdrawn) The agent of claim 4 or 5, wherein the double-stranded RNA comprises the nucleotide sequence of SEQ ID NO: 2.

7. (Cancelled)

8. (Withdrawn) The agent of claim 5, wherein the double-stranded RNA comprises the nucleotide sequence of SEQ ID NO: 2.

9. (New) A method for suppressing cell growth, comprising administering a composition comprising any one of (a) to (c) as an active ingredient to a subject in need thereof:

- (a) a single-stranded RNA complementary to the nucleotide sequence of SEQ ID NO:1;
- (b) a DNA transcribable into the RNA of (a); and
- (c) a vector comprising the DNA of (b).

10. (New) The method of claim 9, wherein the composition comprises a single-stranded RNA complementary to the nucleotide sequence of SEQ ID NO:1.

11. (New) The method of claim 9, wherein the composition comprises a DNA transcribable into the RNA of (a).

12. (New) The method of claim 9, wherein the composition comprises a vector comprising the DNA of (b).

13. (New) A method for suppressing cell growth, comprising administering a composition comprising any one of (a) to (c) as an active ingredient to a subject in need thereof:

- (a) a single-stranded RNA comprising the nucleotide sequence of SEQ ID NO:2;
- (b) a DNA transcribable into the RNA of (a); and
- (c) a vector comprising the DNA of (b).

14. (New) The method of claim 13, wherein the composition comprises a single-stranded RNA comprising the nucleotide sequence of SEQ ID NO:2.

15. (New) The method of claim 14, wherein the single-stranded RNA is 14-25 nucleotides in length.

16. (New) The method of claim 14, wherein the single-stranded RNA is 14-18 nucleotides in length.

17. (New) The method of claim 14, wherein the single-stranded RNA is 16 nucleotides in length.

18. (New) The method of claim 13, wherein the composition comprises a DNA transcribable into the RNA of (a).

19. (New) The method of claim 13, wherein the composition comprises a vector comprising the DNA of (b).

20. (New) A method for suppressing cell growth, comprising administering a composition comprising any one of (a) to (c) as an active ingredient to a subject in need thereof:

- (a) a single-stranded RNA consisting of the nucleotide sequence of SEQ ID NO:2;
- (b) a DNA transcribable into the RNA of (a); and
- (c) a vector comprising the DNA of (b).

21. (New) The method of claim 20, wherein the composition comprises a single-stranded RNA consisting of the nucleotide sequence of SEQ ID NO:2.

22. (New) The method of claim 20, wherein the composition comprises a DNA transcribable into the RNA of (a).

23. (New) The method of claim 20, wherein the composition comprises a vector comprising the DNA of (b).

24. (New) A composition comprising, as an active ingredient, a single-stranded RNA that is perfectly complementary to the nucleotide sequence of SEQ ID NO:1.
